

Efficient Manufacturing

February 9 - 10, 2010
ARBURG Technology Center
California, Irvine, CA

RSVP for the special ARBURG evening event held consecutively right after the end of Plastec West

www.arburg.us

ALLDRIVE

Come visit us

Combine your visit to Plastec West with a stop at the state-of-the-art ARBURG Technology Center California in Irvine, CA.

We will provide for a free shuttle service to Irvine right after the end of the Plastec West on Tuesday and Wednesday. At our Tech Center you will receive comprehensive information on future perspectives for your company regarding cost and energy efficient manufacturing.

Your individual questions will be answered by our experts in a relaxed atmosphere rounded off by a dinner.

Expert Presentations

Together with selected partner companies we will present the following topics:

- Rebate Programs for Molders - **SCE**
- Energy Efficient Molding Facility - **ARBURG**
- Cost Effective Production Cells - **Electroform**
- Efficient Mold & Plant Cooling - **Frigel**

In-Mold Labeling & In-Mold Assembly

In addition to the presentations we will have a machine demonstration of a complete in-mold labeling and in-mold assembly of the car showing running in a stunning sub 12 second cycle.

About the car

The car was manufactured with patent pending process developed by Electroform. It is one of several industry leading developments completed by Electroform's manufacturing group.

How it's made

First a label is inserted in the mold. Six separate parts are molded and then mechanically assembled in the mold without the aid of external automation. A robot removes the fully assembled car out of the mold.

Imagine the possibilities

Multi material molding, multiple labeling options, decorating options and inserting components are just a few of the possibilities.

First-class customer support in the USA

Customer proximity and comprehensive customer consulting have traditionally been a top priority for ARBURG. Our goal is to make this a reality world wide.

Accordingly, ARBURG is well positioned in the USA. In addition to the headquarters in Newington (CT) and the two ARBURG Technology Centers (ATC) in Elgin (IL) and in Irvine (CA), there are eleven further Technical Service Locations which ensure a rapid service. A total of 55 ARBURG employees provide first-class customer support. Moreover, the sales team is actively supported by 20 representatives.

The headquarters and the ATCs are the central port of call for customers and prospects from the relevant regions. Here, a comprehensive pre- and after sales service is available that includes, for example, consulting by experts in applications and turnkey projects, the presentation of the ARBURG technology, mold testing, training and a well-stocked spare parts store.

Take advantage of the opportunity to find out more about our broad range of offerings and our current product range during this special evening event.

We look forward to your visit!

ATC California

Special Opening Hours during Plastec West:

5:00 P.M. - 8:00 P.M.
