

HIDRIVE

Technology Days 2010

including Packaging Technology Forum

Efficient production in focus

18 to 20 March 2010

ARBURG

www.arburg.com

Experience high performance at first hand!

Visit us in Lossburg and experience the future of injection moulding production: effective, cost-effective, high quality. If you want to achieve really efficient injection moulding in your company, you need production solutions individually customised to your plant environment, with special performance characteristics, specially harmonised technology components and special additional equipment.

First-hand expertise

Don't miss out on the specialist presentations. Experts in various fields of injection moulding will inform you on important topics for the future:

- Economic aspects of efficient production
- Presentation of an ARBURG automation solution from a customer viewpoint
- Trends in the surface design of plastic parts
- Innovative mould concepts in packaging technology

New: Packaging Technology Forum

Efficient and high-quality production of packaging items. Learn about and find everything you need for this purpose at our Packaging Technology Forum. Together with selected packaging-sector partners, we will be presenting:

- High-end applications, including the high-speed production of drink bottle caps (72-cavity) or IML tubs (6-cavity)
- Our HIDRIVE hybrid series machines for the highest production performance as well as short cycle times and reduced energy consumption
- Our co-operation partners' systems, peripherals and mould technology

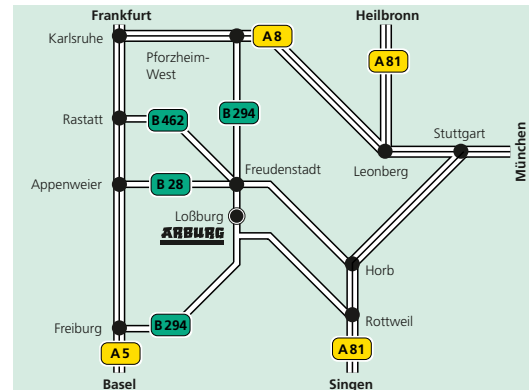

Technology Days at a glance

For three days, a top-class exhibition awaits you in Lossburg! Experience the coming injection moulding sector trends in theory and practice, and much more:

- Brand new: the Packaging Technology Forum in association with selected partners
- Specialist presentations
- New Customer Center
- Representative cross-section of machine range: ALLROUNDERS with clamping forces from 125 kN to 5,000 kN, hydraulic, hybrid and electric drive concepts, horizontal and vertical machines
- Automation solutions with MULTILIFT and six-axis robotic systems
- Complete customer and sector-specific production cells
- More than 40 exhibits with innovative applications
- Production technology, clean room technology and powder injection moulding
- Special forum for "Service Allround" and product training
- Second-hand machine market
- Plant tours focusing on the efficient production and assembly of the ALLROUNDERS, etc.
- All ARBURG contact partners available centrally

How to find us:

Location

ARBURG headquarters in Lossburg

Dates:

from Thursday, 18/3/2010 to Saturday, 20/3/2010
