

ARBURG Declaration regarding Covid-19

Given the COVID-19 pandemic we want to tell you: WIR SIND DA.

In these times, ARBURG feels particularly committed to act on this promise that relates to its employees, customers, and partners.

However, we take the virus and its effects very seriously and want to emphasize that sensible measures to protect people have top priority.

We would therefore like to inform you about the extensive measures ARBURG has taken in the course of its pandemic planning:

- Establishment of a crisis unit
- Informing employees in detail about all internal rules and checking that they are followed
- Compliance with the recommendations of Robert Koch Institute (www.rki.de)
- Coronavirus support hotline
- Organizational and individual protection measures
- Separation measures (home office, extended shift arrangements, separating areas)
- If the minimum distance of 1.5 m is not covered, there is an obligation to wear a mouth-nose mask

The measures we have taken enable us to remain as capable of acting as possible in this dynamic phase and to be there for you.

We are doing everything humanly possible to continue to provide you with our services. This includes machine manufacturing, spare parts supply, service, service hotline, and customer support.

Please understand that it is not possible to individually answer the numerous inquiries.

We thank you for your trust and your support in coping with this challenging situation.
