

# TIQ2 / TIQ8

## Customer benefits

- Open system – high material flexibility
- Heated building platform – passive building chamber (330x330x300)
- Two units for fiber reinforced materials
- Integrated, intuitive operator control
- Industrial drive
- Intelligent monitoring functions
  - Filament and speed monitoring, intelligent start, intelligent material changeover

# TIQ2 / TIQ8

## Customer benefits

- Building chamber 500 x 400 x 450
- Active heated building chamber up to 165°C
- Integrated material dryer and material stock
- Integrated, intuitive control panel
- Intelligent monitoring functions
  - Filament and speed monitoring, intelligent start, intelligent material changeover
