

Leisure

- 570 A 2000 800 Ultimate
 - Part machine base model
 - Cavities 1+1+1
 - Cycle time 50s
 - Material PCR ABS, Eco ABS
 - Shot- / part weight100,5g / 96,5g + 1,8g + 1,1g
 - Family mould
 - Machine base + hopper + GESTICA

- "Machine communicate with mold"
 - moldlife® sense from HACK digital solutions
 - Integrated in POLAR-FORM mould
 - Tool acoustics
 - Plate parallelism measurement
 - Digital part counter
 - Maintenance alignment with machine

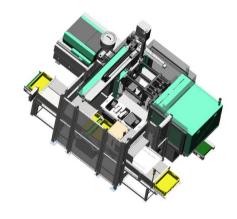

- " Machine communicate with mold"
 - Predicitive Maintenance
 - Increase of availability through monitoring
 - Connection to machine via OPC-UA
 - NEU noise ID of the acoustic sensors for monitoring check mold temperature balance event management

- Automation Interlinking of several processes in a single automation cell
 - Removal of 3 different parts through specific EOAT
 - Ready-to-use
 Step-by-step separation of components from sprue by cutting station
 - Set down on conveyor belt

- Circular economy
 - PCR material produced from collected refrigerators
- "Ensure part quality"
 - Usage of RecyclatePilot for constant part quality
- Recyclate package
 - Reliable processing of recyclates through recyclate modul

570 A 2000 – 800 Ultimate
