

NEW AFTER SALES PRODUCTS

Keep your machine performance at the highest level

Best possible performance

Benefit from numerous optimisations and new developments in our machine software.

Software update

Update for the best possible performance thanks to bug fixes and security updates.

Software upgrade*

Upgrade to a higher software version for higher productivity through new functions.

Fewer unplanned outages

The Machine Health Check helps to recognise potential faults and wear at an early stage. This saves you costs later on and prevents unplanned downtime.

Machine Health Check

Comprehensive visual inspection for a professional assessment of the machine's condition. Included advice on measures makes your maintenance easier to plan.

Machine Health Check Plus

Lower costs thanks to additional measurements to prevent wear at an early stage, such as hydraulic oil purity testing and geometry testing.

Reliable production

Proper maintenance of your machines increases their availability and service life. Our maintenance offer supports you in this and relieves your maintenance personnel.

Maintenance

Maintenance work is carried out in accordance with the ARBURG maintenance schedule.

Highest production quality

Increase the reproducibility of your ALLROUNDER with a machine adjustment.

Certificate of Conformity

Testing and comparison of quality-relevant parameters with ARBURG test equipment in accordance with ISO 9001.

Other recommended packages:

- **Wear Prevention**
for lower costs due to wear and tear
- **Production Quality**
for fewer rejects and higher part quality
- **Operational Safety**
for the protection of your employees
